Find an in-network provider on network web site

You have the *SuperMed Plus* Plan which is provided by Medical Mutual of Ohio.

Each employee receives an ID card through your employer.

Your ID card may be required each time you have any medical visit or procedure done. You are issued two (2) cards when you become part of their employer's coverage. It will arrive with a plan document that informs you of your plans coverage in detail. Each dependent that is a part of the coverage plan can use the same card or a copy of the employees card. Additional card requests are made through your employer's Plan Manager.

Your Plan Document should be read and understood.

Your plan is provided as a document that explains in detail the coverage, costs and procedures related to your medical care. Reading and understanding it before there is a medical need is helpful in avoiding confusion over these issues. The person who can offer additional assistance is your employer's Plan Manager.
